

1. In a communications device having a speed-dial function, a method of
2 improving hands-free operation, including the step of:
3 annunciating, by the device, information identifying the subject of the speed-dial
4 function.

2. The method of claim 1, wherein the information identifying the subject of
2 the speed-dial function includes annunciating the name of a person being dialed.

3. In a communications device having a speed-dial function, a method of
2 improving hands-free operation, including the step of:
3 storing a plurality of telephone numbers in the device in advance of dialing the
4 numbers; and
5 entering an abbreviated command to sequence through the dialing of each stored
6 number.

4. The method of claim 3, including the step of automatically deleting a
2 number after a call to that number has been completed.

5. The method of claim 3, including the step of skipping a number which was
2 unanswered for later recall.

6. The method of claim 3, wherein the abbreviated command is manually entered.
7. The method of claim 3, wherein the abbreviated command is spoken by a user.
